

To whom it may concern,

Declaration about intake of chronic medication  
when departing the country

I hereby declare that the traveler..... ID.....  
is a patient under my supervision and being treated regularly with the medication Produodopa.  
Produodopa is intended for the treatment of Parkinson's disease in an advanced stage and  
combines two drugs:  
Foslevodopa 240 mg/ml  
Foscarbidopa 12 mg/ml

Produodopa is delivered subcutaneously via a pump, with a tube connecting the pump to the  
skin for administration.

Due to the chronic nature of the treatment, it is not feasible to discontinue medication intake.  
Therefore,

I kindly request permission for the travelers to carry their medication with them on the flight.

It is crucial to emphasize that the medication is sensitive to  
temperature. Therefore, it is prohibited to include it in the luggage that  
will be placed in the plane's cargo compartment.

Please confirm that the traveler can board the flight while carrying her/his medicine inside  
the cabin baggage

Please contact me regarding any questions concerning my patient

Sincerely,

Physician's name:.....

Physician's signature and seal:.....

Physician's telephone:.....
